24 August 2007

Dear Mr Shulott,

Thank you for your letters dated 6th July and 10th August.

We have checked our website and it seems to be loading pages properly.

ExxonMobil takes the issue of climate change seriously and we are taking many actions within our business and working with others to address the risks it poses. I enclose a company publication giving further information on our views and actions to address the risks of climate change.

Yours sincerely,

David Eglinton
