1 October 2007

Dear Mr Shullot

Thank you for your letter dated 18 September 2007 addressed to Dr Golby. As Dr Golby is currently unavailable I am responding on his behalf.

I am concerned to hear that you have not received replies to your letters dated 6 July 2007 and 9 August 2007 and should be grateful if you would accept my apologies for the inconvenience that you have been caused.

E.ON recognises the importance of pursuing all available options to meet national energy objectives to reduce CO2 emissions. We are dedicated to the field of renewable energy and our obligation is to supply 6.7% of our electricity from renewable sources including biomass and landfill waste. In the last five years we have invested £225 million in renewable energy and plan to invest a further billion pounds over the next five years.

While we are one of the largest owners and operators of wind farms in the UK, we are also a global leader in planned wind farm investment and are planning to develop the world's largest offshore wind farm. We are investing hundreds of millions into greener energy technology and in replacing our old power stations with new and super-efficient power stations; in addition we operate a range of hydropower schemes. Further information regarding our commitment to renewable energy can be found on our website [powergen.co.uk/renewables](http://powergen.co.uk/renewables).

I trust the information I have provided is useful. Should you need any more assistance please phone me, on 02476 188 148. I will be happy to help you.

Yours sincerely

Diane Robinson  
Directors' Office
