Blyth Road  
Hayes UB3 1BW

Dear Loren Neuenschwander

Well done. You are America's fastest growing international carrier with more and more routes being added all the time. I am a regular flier with you, particularly when traveling with my American business colleagues to Colombia, the Ivory Coast, Panama and the Cayman Islands. Add Iraq and Afghanistan and I'll be a very happy man.

I'm concerned about climate change. It looks like your government is the only one taking a stand against it. Understand me when I say that Peter Shullot is a man who does not laugh about George Bush. Your brave President has stood up to the greens, refused to sign the Kyoto Protocol and only made verbal commitments on the environment which he knows he can never be held to.

And the thanks you get as the foremost American airline? The Airline Passenger Duty, threats by the European Union to introduce flights in the Emissions Trading Scheme and campaigns against larger airports.

The air transport industry supports 10% of global economic industry. By persuading everyone to stop flying, do the governments of Europe want global meltdown?

As an American company you must look at us across the water with despair. Did the US save us in the First World War, the Second World War, the Cold war and nearly start the Third World War only to be imposed with this? Wouldn't it have been better to let Hitler and Stalin actually win World War Two?

Let me know how you intend to keep the skies free from the green scourge.

Good luck to you and your fine company.

Yours sincerely

Peter Shullot
